

FOOD CONTACT DECLARATION

It is the responsibility of our customers to check if the materials supplied by SABIC and articles made out of it are suitable for the intended use and comply with all applicable regulations and requirements.

We confirm that **SABIC[®] HDPE ICP5506 00900** has been formulated and manufactured in accordance with the compositional requirements of the following food contact recommendations or regulations:

Germany

Empfehlung III "Polyäthylen" of Kunststoffe im Lebensmittelverkehr: Empfehlungen des Bundesinstituts für Risikobewertung (BfR) (former BgVV).
Status: March 2011.

Bedarfsgegenständeverordnung in der Fassung der Bekanntmachung vom 23 December 1997, latest amendment February 15, 2016 (BGBl. I S. 198)

UK

Plastics for food applications: A code of practice for safety in use, issued by BPF/BIBRA. 1991 Edition.

EC

Commission Regulation (EU) No. 10/2011 of January 14, 2011, including its amendments (EU) No. 1282/2011 of November 28, 2011, (EU) No. 1183/2012 of November 30, 2012, (EU) No. 202/2014 of 3 March 2014, (EU) No. 2015/174 of 5 February 2015, (EU) No. 2016/1416 of 24 August 2016 and (EU) 2017/752 of 28 April 2017.

This material contains 1-Hexene, which has a specific migration limit of 3 mg/kg food.

This material does not contain intentionally incorporated additives which are regulated with a specific migration limit.

This material contains one or more intentionally added dual use additives which are subject to disclosure of adequate information as described in Annex IV of Commission Regulation (EU) 10/2011.

The identity of this/these substance(s) can be disclosed for testing purposes upon special request and under maintaining secrecy.

This material has been manufactured in accordance with the relevant requirements of Commission Regulation EC No. 2023/2006 on good manufacturing practice for materials and articles intended to come into contact with food.

2017: Version 2

Migration estimates calculated with an EU recognized mathematic migration model or migration experiments (surface area to volume ratio = 6) with test samples (1.6 mm test plaques) made of SABIC[®] HDPE ICP5506 00900 or a comparable grade and carried out under conditions covering long term storage above 6 months at room temperature and below, including heating up to 70 °C for up to 2 hours, or heating up to 100°C for up to 15 minutes in the standard food simulants according to Table 1 of Annex III of Commission Regulation (EU) No 10/2011 have shown, that under these conditions migration limits (overall and if relevant specific (see above)) were not exceeded:

- with non-fatty food simulants and
- with fatty food simulants.

USA

Code of Federal Regulations, issued by Food and Drug Administration (FDA), paragraph 21 CFR 177.1520 (olefin polymers).

Extraction experiments with test samples made of SABIC[®] HDPE ICP5506 00900 or a comparable grade, have shown that extraction limits specified for use in articles used for packing or holding food during cooking (specification 177.1520(c)3.2a.) were not exceeded.

The adjuvants are cleared according to Part 178 (Indirect food additives) or are generally recognized as safe (GRAS), or are prior-sanctioned food additives.

Status: June 2017.

The People's Republic of China

SABIC[®] HDPE ICP5506 00900 comprises a resin which is listed in PRC National Standard GB 4806.6-2016, Table A.1., entry 101 (CAS 25213-02-9) and complies with any applicable requirements for that resin, as tested with the above material or a comparable grade.

All intentionally added substances used in the production of **SABIC[®] HDPE ICP5506 00900** that are subject to PRC National Standard GB9685-2016, regulating the use of additives in food contact materials and products, are listed on this standard for the aforementioned resin or are listed on Table A.2 of PRC National Standard GB 2760-2014, regulating the use of food additives.

This material contains one or more monomers which are regulated with a restriction in their use. The identity of this/these substance(s) can be disclosed for testing purposes upon special request and under maintaining secrecy.

This material does not contain additives which are regulated with a restriction in their use.

2017: Version 2

We wish to stress that the migration- and extraction- test results, referred to in this declaration, may differ significantly from the performance of the final plastic material or article under the actual and foreseeable conditions of use.

SABIC has no control over final product composition nor over processing conditions. It is therefore the responsibility of the converter or food packager that markets the final material or article to check compliance with the relevant regulations and to validate material performance in the end application through proper end use testing.

Most of the recommendations or regulations mentioned above refer to the final materials and articles that directly contact the food.

This declaration however, is restricted to SABIC[®] HDPE ICP5506 00900 as it leaves the production facilities.

This declaration does not cover

- any substance subsequently added by the converter,
- poor material or end product due to inexpert manufacture by the converter,
- any negative influence of the finished article on the organoleptic properties of the packaged food.

As the above-mentioned Regulations develop continuously, our declarations will be adapted accordingly. Therefore we advise the receivers to ask for a new declaration periodically.

This declaration replaces all previous ones relating to this subject.
