

Wipes Dispensing Range

Metaplast pails provide the perfect packaging solution for industrial and clinical wipes packs from 2 litre to 10 litre in capacity.

Our fully automated manufacturing and in-mould labelling operation allows our products to be made to your custom specifications complete with stunning graphics to promote your brand and products.

Pails are manufactured at our BRC Accredited facility in tough, food-grade and chemically resistant polypropylene to comply with industry standards and are 100% recyclable.

Features

Re-closeable cap keeps wipes wet

Refillable; lid allows multiple opening and closing (seal broken on first opening)

In-mould labelling (IML) creates stunning scratch-resistant graphics to promote your brand and products

Stable stacking for safe distribution and attractive retail display

Comfortable and secure handles; plastic or steel with ergonomic plastic grip

Compatible with automated filling and sealing equipment

Tamper-evident security tabs indicate whether the container has been opened prior to purchase

Lid allows multiple opening and closing (seal broken on first opening)

Produced in a BRC Approved facility, approved for food contact, which also meets FDA regulations

All Metaplast packaging is made to be re-used and/or recycled
