Manufacturers and Distributors of high quality  
plastic containers to the commercial sector

#### Compatibility

Some chemicals, and process parameters, can affect the integrity of the container. The buyer must undertake testing and approval for the container's suitability for the product or application.

Packaging intended for direct and indirect contact with food.

The packaging requires storage and transport testing in the environment of its intended use.

It is the responsibility of the customer to match the packaging with the target batch.

All materials and dyes used to produce container or lid designed for the food sector are approved for food contact.

Manufacturer is not responsible for container deformation due to stacking pallets or putting on them an extra load.
