Dimensions

Upper Length (with flange)	277mm
Upper Width (with flange)	200mm
Bottom Length	246mm
Bottom Width	168mm
Height	186mm
Height with lid fitted	186mm

Weight

Bucket weight (without handle)	172.8g
Handle weight (metal)	25g
Lid weight	50g
Weight tolerance	+/- 5%
Dimension tolerance	+/- 1mm

Nominal Capacity	5,000 ml
Total Capacity (to brim)	6,200 ml
Capacity under lid	5,700 ml

Stacked loading

Max. load on bottom bucket (transparent buckets)	15.8 Kg
Max. load on bottom bucket (white & coloured buckets)	19.8 Kg

Values apply to ambient temperatures
below 23°C

Raw Material / Transport and Warehousing

Buckets and lids are made from food-grade polypropylene (PP).

Warehousing: sealed unit pallets, which include even numbers of bases and lids.

Filling and closing conditions: max. content temperature during filling 95°C. For stacking content temperature should be lower than 45°C. Put not more than 2 warm containers in the stack.

When outside temperature decreases to 25-30° containers will be more rigid and mechanical parameters allowing stacking for maximal static load as below.

Palletizing of containers: product with density 1,6 g/cm³ according to the customer practice giving consideration to the mentioned earlier values.

All materials and dyes used to produce container or lid designed for the food sector are approved for food contact.

All packages from a single pallet should be used immediately after unpacking.

Manufacturer is not responsible for container deformation if stacked with other products on top of finished pallet.

Pelletisation at delivery

1,105 units (buckets & lids)
per pallet

Standard Colours

Other colours available (subject to
minimum order quantity).
