## Dimensions

Upper Length (with flange)	340mm
Upper Width (with flange)	262mm
Bottom Length	302mm
Bottom Width	224mm
Height	237mm
Height with lid fitted	239mm

## Weight

Bucket weight (without handle)	358g
Handle weight (metal)	45g
Lid weight	104g
Weight tolerance	+/- 5%
Dimension tolerance	+/- 1mm

Nominal Capacity	12,000 ml
Total Capacity (to brim)	13,400 ml
Capacity under lid	12,400 ml

## Stacked loading

Max. load on bottom bucket (transparent buckets)	44 Kg
Max. load on bottom bucket (white & coloured buckets)	55 Kg

Values apply to ambient temperatures  
below 23°C

## Raw Material / Transport and Warehousing

Buckets and lids are made from food-grade polypropylene (PP).

Warehousing: sealed unit pallets, which include even numbers of bases and lids.

Filling and closing conditions: max. content temperature during filling 95°C. For stacking content temperature should be lower than 45°C. Put not more than 2 warm containers in the stack.

When outside temperature decreases to 25-30° containers will be more rigid and mechanical parameters allowing stacking for maximal static load as below.

Palletizing of containers: product with density 1,6 g/cm<sup>3</sup> according to the customer practice giving consideration to the mentioned earlier values.

All materials and dyes used to produce container or lid designed for the food sector are approved for food contact.

All packages from a single pallet should be used immediately after unpacking.

Manufacturer is not responsible for container deformation if stacked with other products on top of finished pallet.

## Pelletisation at delivery

500 units (buckets & lids)  
per pallet

## Standard Colours

Other colours available (subject to  
minimum order quantity).
